

**TECHNICAL CHARACTERISTICS**

Traditional grease dating from 1872, based on 3 different types of oil: plant (linseed oil), mineral and animal.

It nourishes, softens, protects and waterproofs. OURALINE grease restores the moisture lost by the leather as it ages and prevents hardening and cracking.

It is a very nourishing product that keeps the leather supple in footwear subjected to conditions such as rain, snow, mud, cold...

It is ideal for hunting and sporting goods, but also for oiled clothing and textiles (such as Barbour).

**APPLICATION FIELDS**

Smooth leather, oily leather and nubuck.  
 Oiled clothing and textiles.

**INSTRUCTIONS**

1. Apply Ouraline grease to the surface of the leather using a chamois cloth
2. Rub the grease in thoroughly to ensure good penetration.
3. Allow the grease to soak in for a few seconds
4. Remove excess product to avoid staining

**ADVICES**

It is advisable to check the compatibility of the product with your leather by testing it on an invisible area.

**PACKAGING/ CONDITIONING**

Volume	WRAPPING			PACKAGING			
	Type	Dimension mm		Quantity per box	Dimension mm		
		Diameter	Height		Length	Width	Height
100 ml	Tin	85	25	12	195	190	95
250 ml	Tin			6
